WORK EXPERIENCE

Interactive Developer, Trivium Interactive, Boston, MA — Mar ‘23 - Jul ‘26

- Developed interactive exhibits in Unity alongside a multidisciplinary team of seven to twenty people
- Connected interactives to a custom API to integrate content management systems
- Incorporated internal and client feedback to improve functionality and usability of interactives
- Wrote design documents for gameplay structure and incentive systems of a multi-interactive project

Mission Engineer, Naval Undersea Warfare Center (NUWC), Newport, RI — Jul ‘20 - Sep ‘21

- Co-ran a tabletop wargame of four teams of officers and engineers
- Provided weekly analysis on moves from each team and how their actions would impact the game
- Wrote documentation to inform senior officers about the processes and results of the game

PROJECTS

National Constitution Center: America’s Founding, Trivium Interactive (Team of 13) — Apr ‘25 - Feb ‘26

- Networked stations together into a full system to allow for docent guidance
- Assisted in making design decisions throughout the production process
- Connected to a custom backend content management system to populate data
- Created a custom interface so users could navigate using assistive hardware and audio guidance
- Delivered an in depth testing document to the QA department to catch any potential errors
- Ran user testing and implemented changes to address user feedback

Indiana Donor Network Memorial Experience, Trivium Interactive (Team of 11) — Apr ‘24 - Oct ‘25

- Networked all programs together and managed a complex queue of user experiences
- Pulled data from a custom backend to populate user search results
- Updated the project with full Spanish language support
- Interfaced with network printers to deliver customizable keepsakes for users to take home

San Diego Gas & Electric: The Resilience Zone, Trivium Interactive (Team of 18) — Jun ‘23 - Apr ‘24

- Co-created game design document
- Balanced scoring criteria across all nine games
- Fully developed gameplay and UI programming of one of the games
- Integrated gameplay with custom networked control system and IR overlay hardware
- Oversaw user testing and integrated user feedback

Loop ‘Em Up, GMTK Game Jam ‘25 Submission (Team of 3) — Jul - Aug ‘25

- Developed an arcady survivors-like in Godot
- Designed and implemented the enemy spawn system
- Programmed systems interactions and game state management

Unweighted, GMTK Game Jam ‘22 Submission (Team of 3) — Jul - Aug ‘22

- Developed an isometric puzzle game in Godot
- Programmed player movement with respect to the tile map
- Designed puzzles and managed their order presented to the player

SKILLS

Programming: C#, GDScript, C++, Python, Lua, C
Engines/Frameworks: Unity, Godot
Software: GitHub, Jira, Advanced Excel

EDUCATION

Worcester Polytechnic Institute (WPI)
Bachelor of Science; Computer Science and Robotics Engineering — May ‘20
